28 January 2002

On Shabbas, 26 January 2002AD, an unsolicited virtual message was deposited on my telephone requesting my immediate comments concerning the "Microsoft" litigation. Please for the sake of immediacy do not make the mistake of recasting the story of Genesis 25:29-34. The action taken must avoid the tokology of yet another monster marching through-out the Lands of this World.

The objective of governance should be to protect the rights and freedoms of People (be they individuals or organizations) against predicated statements by any entity conspiring to suppress and gain absolute control or power.

In presenting and resolving this and similar issues, perhaps the views of Dr. Herbert I. Schiller should be considered. I understand that his observations are available in such works as "Culture, inc."/"Living in the number one country"/"Mass communication and American empire".

In resolving the arguments, Please do NOT make the mistake of ESAU by selling a need of the moment to satisfy greed.

"Happy trials" & Trails!

Harold R. Andrus, Jr
